

TX RX Systems, Inc. Signs Distribution Agreement with Navair Technologies to Distribute Land Mobile Radio Interference and Coverage Solutions in Canada

March 6, 2019 -- Mississauga, Ontario, Canada and Angola, New York -- TX RX Systems, Inc. signed an agreement with Navair Technologies to distribute land mobile radio (LMR) interference and coverage solutions in Canada.

Since 1976 TX RX Systems has been a leader in this marketplace through its combiners, filters, duplexers, tower top amplifiers, receiver multicouplers, power monitors, and site optimization services.

Navair Technologies is a 1st tier distributor of RF conditioning and test and measurement solutions for the avionics, wireless, infrastructure and public safety marketplaces in Canada.

“The partnership with Navair Technologies enhances our ability to provide small, integrated, and low RF-loss combining and filtering solutions to the LMR market throughout Canada,” said Mike Ryan, Director of Sales and Marketing for TX RX. “We look forward to working together with Navair Technologies, which has an experienced distribution, customer service and technical team to support customers in this marketplace.”

“We are delighted to represent and distribute this exceptional line of solutions from TXRX Systems,” said Elci Gos, National Sales Manager for Navair Technologies.
