

TX RX Receives ISO 9001:2015 Certification

Angola, NY, August 20, 2019 – TX RX is excited to announce that it has received the official certification for ISO 9001:2015 Standard.

ISO 9001 is defined as the international standard that specifies requirements for a quality management system. Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. In addition, the 2015 revision of this standard emphasizes leadership, opportunity- and risk-based thinking, and continual improvement.

According to Minfei Leng, TX RX president, “TX RX has always focused on product quality and customer satisfaction in its 43-year history, and it has gained the industry leading reputation because of that. Many of our current processes are already compatible to the ISO requirements. Making the efforts to obtain the official ISO 9001 certification is simply another visible demonstration of our commitment to excellence in our business operations, and a great mechanism to prepare the company for future growth.”

About TX RX -- Since 1976 TX RX Systems has been a leader in RF conditioning and combining solutions. It provides a variety of combiners, filters, duplexers, tower top amplifiers, receiver multicouplers, power monitors and site optimization services to the land mobile radio market.
