

1-Port Omnidirectional Antenna

410–430MHz

DS040356-1A

Model #: 104A-60M-03-00-07-N

Description

This antenna with a broad frequency band and rugged construction is ideal for both base station and marine deployments. Radiating elements are encased in a weather-resistant, low-loss fiberglass radome. The size and mounting fixtures allow for easy storage and fast installation. Ideal for use where reliability is of the utmost importance. With a sturdy and strong construction, these antennas have been designed for a long lifetime.

Features

- 3 dBd (5.2 dBi), vertically polarized, omnidirectional base station and marine antenna, covering the 410–430 MHz band
- Shipped with the sturdy “LW” mast mount – a lightweight, multipurpose, epoxy-coated mounting bracket made of non-corrosive aluminum
- The accompanying U-bolts and fittings are made of stainless steel
- Can be mounted vertically or horizontally on 16–54 mm (0.6–2.1 in) diameter mast tubes
- The carefully designed radiating element is sealed within a high-quality, fiberglass radome with low windload, which will ensure performance undisturbed by corrosive environments
- To substantially reduce noise caused by atmospheric discharges, all metal parts in the antenna are DC-grounded. Consequently, the antenna shows a DC-short across the coaxial cable
- The exceptional mechanical capabilities of this antenna ensure long dependable service in all environments
